

In September 2005 the first 100 trees were planted in an outline of the letter "R" to commemorate the 150<sup>th</sup> birthday of rotary International. Since that initial planting many additional trees and shrubs have been planted and blossomed, producing a transformed picture of what was a "scrub block". The plan now well underway is creating a community parkland area to support native flora and fauna. With the support of the Wattle Range Council and members of our community we anticipate that the years ahead will reflect the concern we have for the health and the beautification of our environment.

In 2003 Millicent Rotary Club "adopted" the long neglected 2.4 hectare block bounded by Williams Road, Batty Street, Park Tce and the Lakeside Caravan Park whilst looking for a major project to mark the Centenary of Rotary International in 2005. Known as the "scrub block" it had been largely over-taken by range of woody feral plant species. A plan was developed to turn the area into a Park that the community could enjoy. Advice was sought from Wattle Range Council, the Dept. of Environment, and the Native Vegetation Council. With a government Enviro Fund Grant made available, work commenced. The offending vegetation was removed and a walk through the Park was added in the shape of an "R" to signify it as a Rotary Project.
